Enjoy highest yield and
quality by clever
combining!

TP ÖKO-AIR-STAINLESS STEEL

- Multifunctional seeding unit stainless steel with 50x50 square tube
- 12V single fan
- Selective 2,3,4 or 5 outlet tubes (diam 30mm), 6 or 8 outlet tubes (Dm 25mm) incl. hoses and spreader plates
- 90-lit (Standard) hopper incl sealed cover
- 12-v-drive from tractor battery
- Adjustabel flap
- Electric seedroll motor
- Standard seedroll mounted
- Agitator
- FOR SMALL SEED AND MICRO GRANULATES
- **WORKING WIDTH 1-4m**

Inkl. PROFI CONTROL (in cab)

- On/off
- Stepless adjustment of seedroll speed
- On/Off-Sensor and seedroll sensor
- Calibration function
- Cable length 7m

OPTIONAL (extra price)

- SEEDER+ control unit
- Fully automatic, speed vario control,
- with on/off sensor and speed sensor

Equipment

- Seedroll for small amount (5mm, 10mm or 15mm)
- Stainless steel flap with nose
- Metal seedroll
- 300-liter hopper incl.frame
- 60- or 105-Liter hopper
- 130-Liter hopper
- Grubber frame
- 3-Point frame

TP ÖKO-AIR-GALVANIZED

- Multifunctional seeding unit galvanized, with 50x50 square tube
- 12V single fan
- Selective 2, 3, 4 or 5 outlet tubes (DM 30mm); 6 or 8 outlet tubes (DM 25mm)
- Incl. hoses and spreader plates
- 90-lit (Standard) hopper incl sealed cover
- 12V-drive from tractor battery
- Adjustable flap
- Electric seedroll motor
- Standard seedroll mounted
- Agitator
- FOR SMALL SEED WORKING WIDTH 1-4m

Incl. PROFI control (in cab)

- On/Off
- Steppless adjustment of seedroll
- On/Off sensor and seedroll sensor
- Calibration
- Cabel length 7m

OPTIONAL (extra price)

- SEEDER+ control unit
- Fully automatic
- Speed vario control
- with on/off sensor and speed sensor

EQUIPMENT

- seedroll for small amount (5mm, 10mm or 15mm)
- Stainles steel flap with nose
- Metal seedroll
- 300-Liter hopper incl. frame
- 60- or 105-Liter hopper
- 130-Liter hopper
- Grubber frame
- 3-Point-frame

TP ÖKO-TURBO

- Multifunctional seeding unit steel- with 50x50 square tube
- Selective 2, 3, 4, or 5 outlet tubes (diam 30mm); 6 or 8 outlet tubes (diam 25mm)
- Incl. hoses and spreader plates
- 90-lit (Standard) hopper incl. sealed cover
- 12v-drive from tractor battery
- Adjustabel flap
- Electric seedroll motor
- Standard seedroll mounted
- Agitator
- FOR SMALL SEED AND MICRO GRANULATES
- **WORKING WIDTH MAX.0,5-1,8m**

Incl. elektric control unit (in cab)

- On/Off
- Stepless adjustment of seedroll
- Calibration
- Without sensor
- Cable lenght 7m

OPTIONAL (extra price)

- SEEDER+ control unit
- Fully automatic, speed vario control with On/off sensor and speed sensor
- Cabel lenght 7m

EQUIPMENT

- Seed roll for small amount
- Stainles steel flap with nose
- Metal seed roll
- 60- or 105-Liter hopper
- 130-Liter hopper
- Grubber frame
- 3-Point frame

Select a suitable seedroll for different jobs. Driven speed, working width, seed roll and outlet tubes are factors to select a correct seedroll.

Metal seedroll

For seeding, cereals, grass seed, Soybean.

Seedroll for small amount

For rapeseed, granules, small seeds:
5 mm, 10mm and 15mm

Standard seedroll

Included with the machine.

Adjustable flap stainless steel with nose

For use in combination with seedroll for small amount for accurate seed output.

3-Point frame and grubber frame

For easy montage

Selective 60,- 90,-105, and 130-lit plastic hopper with litre scale and sealed cover with screw cap

TP SIUG-SECURITY

The precise way to protect crops and save cost

- Seeding unit GALVANIZED with 50x50 square tube
- 90-lit plastic hopper (Standard) with sealed cover
- Spreader plate stainless steel
- Adjustable throw plates
- Electric drive from 12V battery
- Heavy duty motor for spreader plate 240W
- Agitator
- Standard seedroll mounted
- Stepless adjustment of output speed of spreader plate (working width)
- Electric drive of seed roll with separate motor
- Adjustable hand over point on spreader plate
- **Working width 2,5-28m**

Options

60- or 105-lit. hopper

130-lit. hopper

3-Point-frame

Grubber-frame

Incl. PROFI control unit

- Potentiometer 1: Adjustment of seedroll rotation for requested output amount
- Potentiometer 2: Adjustment of spreader plate rotation for requested working width
- Cable lenght 7m

Optimize natural potential and harvest golden product quality

TP PROFESSIONAL

Comfort and performance for the best price

- Spreader for small seed, with KTL-power coated frame with a 50 x 50 square tube
- **90-lit.** (Standard) plastic hopper with sealed cover, easy emptying and litre indication
- Stainless steel spreader plate and feeder
- Equal output and seed adjustable
- Agitator
- Adjustment of spreading schema on the spreader plate
- Electric drive from tractor battery (12V)
- Electric switch (motor) operated with feeder 240N
- Heavy duty spreader plate motor (2.700 rpm, 200W- required amperage: to start 15A-in service 5A to 20A)

S,

Incl. control unit (in cab)

- ON/OFF
- Feeder open/close
- Stepless adjustment of rotation speed (adjustment for working width)
- Cable length 7m

OPTIONAL (extra charge)

- 60- or 105-lit. hopper
- 130-lit. hopper
- 3-point-frame
- Grubber frame
- Spread limitation plate

TP DISC-KOMBI

Optimize greenland with the TECHNIK-PLUS pneumatic seeder, stainless steel tower distributor and 20 double disc shares for 3m or 40 shares for 6m working width. 3 to 60kg seed amount per hectare are getting spreaded precise and independent from speed. The seeds are applied into slots and can quickly grow in optimal light and humidity areas. The mixing of vermiculite stone powder for storing dew moisture has turned out to be a great solution during dry periods.

TP TURBO JET SUPER

According to the trend of more powerful machines TECHNIK-PLUS introduces the TURBO JET SUPER. This machine can be equipped with a hydraulic driven high performance turbine or a 2 x double turbine (Quattro) fan with 5.400 or 6500 rpm. The seed roll motor is driven electric 12 V. Easy and exact programming of the control unit in the cab makes the operation efficient. Working widths up to 15m for small seeds and up to 4m for wheat, barley, oats, wicke etc. are reached in the practical use.

TP WINTER-PROFI

For the distribution of salt, sand and split. The spreader is used for sowing sand, salt and small shredded gravel on to snowed roads or parking places. Tank is made of rigid plastic material. You may order tanks of the following volumes: **60, 90, 130 or 300-liters.** Dosing unit is made of high-quality stainless steel. The sower is controlled with control panel from the tractor's cabin.

TP CONVENIENCE

Basically the spreader TP-Convenience is used for spreading big areas in a short time. Depending on the seed the working width changes from 6 to 21m (grass seed about 6m rape, clover, mustard, about 18m and slug pellets about 21m) it is possible to put out every seed between a size of 1mm to about 6mm. (Depends on how flow of the seed is and on the output amount.)
